SUMMARY

Senior AI Data Engineer & Full-Stack Developer with 10+ years of experience across the SAP ecosystem, specializing in **Data Analytics, AI-driven insights, SAP HANA Cloud, SAP Analytics Cloud, SAP BTP, and Cloud Application Programming (CAP)**. Strong background in building large-scale analytical solutions, backend services, high-performance data pipelines, and internal developer tools for SAP Commerce Cloud. Known for strong ownership, clean engineering, cross-functional collaboration, and delivering data products that drive business and technical decision-making.

EXPERIENCE

Senior AI Data Engineer

SAP Commerce Cloud

January 2024 – Current, Munich, Germany

- Engineered end-to-end **data pipelines** across SAP BTP and Java-based ETLs to extract, transform, and load large datasets into HANA while ensuring data quality, consistency, and operational efficiency.
- Contributed to early AI adoption by implementing various **AI-powered summarization and insights** across different aspects.
- Operated as a key member of a lean team, demonstrating strong leadership, cross-functional collaboration, and the ability to drive initiatives from planning through execution.
- Took full ownership of major data and engineering projects, overseeing design, development, testing, and rollout, while ensuring high quality and on-time delivery.

Data Scientist

SAP Commerce Cloud

May 2022 – December 2023, Munich, Germany

- Developed multiple analytical dashboards in **SAP Analytics Cloud (SAC)** that delivered key KPIs and actionable insights, enabling stakeholders to make informed, AI-powered, data-driven decisions.
- Built and maintained **SAP HANA Cloud data models and database structures**, optimizing performance and reliability for analytics at scale.
- Led UI/UX development for internal tools, aligning with **SAP Fiori standards** to enhance usability and improve internal user experience.

Working Student

SAP Commerce Cloud

May 2020 – May 2022, Munich, Germany

- Built dashboards to analyze SAP Commerce Cloud data, leveraging **SAP HANA** and **Java** to design the supporting backend infrastructure.
- Developed backend services consumed by **SAP Analytics Cloud (SAC)** to deliver comprehensive reports and product usage insights.

SAP Kyma

November 2019 – May 2020, Munich, Germany

- Contributed to SAP Kyma by developing a GoLang-based integration library and working with Kubernetes/Docker deployments across AWS, Azure, and GCP.

Associate Developer

SAP Master Data Management

August 2018 – August 2019, Bengaluru, India

- Contributed significantly to building a **centralized Product Master Data orchestration solution** on the SAP Cloud Platform, improving data consistency and system-wide governance.
- Led the use of **SAP Cloud Application Programming (CAP)** to design and develop a suite of core backend services supporting product lifecycle workflows.
- Developed strong expertise in **SAP HANA Cloud** and **SAP Fiori**, applying both across multiple stages of the project to enhance data handling, performance, and user experience.

Associate Developer

SAP Fieldglass

July 2015 – July 2018, Bengaluru, India

- Contributed to multiple components of the SAP Fieldglass cloud-based vendor management system, supporting feature development and system enhancements.
- Created REST APIs to extend backend service capabilities, applying Spring framework best practices for modular and maintainable code.
- Supported continuous development of backend systems by integrating Java microservices for smoother data exchange and operational consistency.

SKILLS

Cloud & SAP Technologies: SAP Analytics Cloud (SAC), SAP HANA Cloud, SAP BTP, SAP Cloud Application Programming (CAP)

Programming & Development: Java, Python, SQL, SAP Fiori UI/UX, performance tuning & optimization

Data, Analytics & AI : Data analytics, AI-based summarization & insights, automated error analysis, forecasting & anomaly detection, data modeling & HANA optimization

Pipelines, CI/CD & DevOps: Jenkins, GitHub Actions, Hyperspace pipelines, build & deployment automation, monitoring & maintenance of end-to-end data pipelines

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Manipal Institute of Technology • Manipal, Karnataka • 2015 • 8.78
